

## Bio-SV Compact

The plug & play depacker made in France

Designed as a high-performance depackaging solution for facilities processing **up to 10,000 tonnes of packaged biowaste per year**, the Bio-SV Compact delivers a level of separation between packaging and organic material matching the performance of the Bio-SV, in a more compact format.

MADE IN  
FRANCE

### Innovation

- A **plug & play design**
- An easily **transportable structure**
- An **immediate start-up**

### Performance

- Processing capacity : **4 to 12 t/h**
- High quality output matériel : compliant with applicable **regulatory standards (>99,7%)**

### Key benefits

- The **mechanic** separation principle → **maximum reliability** and **optimal organic slurry quality**
- The **access** to components and **fast** tool-mounting system → **easy maintenance**
- The **intuitive** operator interface → **ease of use**
